24/7

The Soleil Aurora environmental control system, powered by TGC, combines highquality components and construction with easy to use functionality. Offering complete control for any size grow, Soleil Aurora's proprietary control system doesn't require complicated programming—simply use the intuitive touchscreen interface to begin controlling nutrient and water delivery, capturing environmental data, and controlling lights in your cultivation facility.

Soleil® Aurora

- Unlimited Number of Rooms
- Skid Mounted 220-240V
- Two 100 Gallon Tanks
- Batch System
- Unlimited Nutrient Zones
- Touchscreen and Mobile Interface
